Notes

- 1) Alternate water status based on results received through April 8, 2022.
- 2) Connected to PWS, according to information provided by PWS or homeowner.
- 3) Saint-Gobain will authorize Pennichuck Corporation to complete engineering and design studies sufficient to evaluate the feasibility of water line extensions as an appropriate remedial action. Saint-Gobain will then authorize Pennichuck to complete such water line extensions if, once the design is complete, waterlines remain feasible and appropriate under the remedy selection criteria described in the Term Sheet.
- 4) Undeveloped property with an address and frontage to a water line extension area. A curb stop will be installed if NHDES approves and determines this parcel may be developed, and a curb stop is allowed by the PWS.
- 5) Undeveloped property with an address and frontage to an existing water line area, or no frontage to a water line extension area. No curb stop will be installed.

Notes

- 1) Alternate water status based on results received through April 8, 2022.
- 2) Connected to PWS, according to information provided by PWS or homeowner.
- 3) Saint-Gobain will authorize Pennichuck Corporation to complete engineering and design studies sufficient to evaluate the feasibility of water line extensions as an appropriate remedial action. Saint-Gobain will then authorize Pennichuck to complete such water line extensions if, once the design is complete, waterlines remain feasible and appropriate under the remedy selection criteria described in the Term Sheet.
- 4) Undeveloped property with an address and frontage to a water line extension area. A curb stop will be installed if NHDES approves and determines this parcel may be developed, and a curb stop is allowed by the PWS.
- 5) Undeveloped property with an address and frontage to an existing water line area, or no frontage to a water line extension area. No curb stop will be installed.
